PROFESSIONAL SUMMARY

AI & Full Stack Developer with hands-on experience building scalable web applications and LLM/RAG-powered systems using Python, React, Flask, and FastAPI. Proficient in designing RESTful APIs, integrating AI models into production environments, and deploying robust cloud solutions on AWS. Passionate about creating impactful, AI-driven products that address real-world challenges.

TECHNICAL SKILLS

Languages: Python, C++

Web Development: HTML, CSS, JavaScript, React, Node.js, Flask, FastAPI

AI / ML: Scikit-learn, TensorFlow, LLM, RAG, LangChain, OpenCV, OCR

Databases: MySQL, PostgreSQL

DevOps & Tools: Git, Docker, AWS

Core Concepts: OOPs, DBMS, DSA, SDLC, RESTful API

EXPERIENCE

AI & Full Stack Developer | Diyan Tech Solutions

Nov 2025 – Present

- Developed scalable web applications using Flask, React, HTML, CSS, and JavaScript with a strong focus on AI/ML integration and production readiness.
- Designed and implemented RESTful APIs, connecting front-end interfaces with back-end services and relational databases for seamless end-to-end data flow.
- Developed and deployed LLM-powered features leveraging Scikit-learn, TensorFlow, and LangChain on AWS, ensuring scalable and reliable delivery.

PROJECTS

Stock AI Chatbot | LLM · RAG · LangChain · FastAPI · React · ChromaDB · Groq API

2026

- Built an intelligent stock analysis chatbot using a full LLM-RAG pipeline with LangChain, enabling context-aware financial Q&A through semantic retrieval via ChromaDB as the Vector Database.
- Leveraged MongoDB for persistent chat history storage; developed a high-performance FastAPI back-end with a React front-end, utilising Groq API for ultra-low-latency inference.

Security Monitoring System | SIEM · SOAR · XDR · Wazuh · Docker

2025

- Engineered a SIEM, SOAR, and XDR pipeline using Wazuh and Docker; integrated the Telegram API for automated real-time incident alerting and SSH brute-force attack detection.

Smart Navigation Assistance for the Visually Impaired | IoT · OpenCV · OCR · Kotlin

2024

- Developed an IoT-based smart blind stick with ultrasonic sensors for real-time obstacle detection, with GPS and GSM integration for live location tracking and emergency SOS assistance.
- Built a Kotlin mobile app leveraging OpenCV and OCR for text recognition and object detection, achieving 86% image captioning accuracy with text-to-speech output.

LEADERSHIP

Technical Team Coordinator

- Led academic project teams, resolved technical challenges, and ensured on-time delivery while consistently improving team collaboration and overall code quality.

SOFT SKILLS

• Problem Solving • Communication • Team Collaboration • Time Management • Adaptability • Quick Learning

EDUCATION

B.Tech in Information Technology — College of Engineering Guindy, Anna University

2020 – 2024

GPA: 7.5 / 10

CERTIFICATIONS

- Full Stack Development — GUVI | Front-end, Back-end, REST APIs, Database Management & Deployment.
